

# got flats?®

## TyrFil® GREEN

### THE MOST RELIABLE, ECONOMICAL, ECO-FRIENDLY FLATPROOFING!

TyrFil Green, a consistently measured mix of recycled tire fill and virgin tire fill, fully displaces the air in tires. TyrFil Green allows industrial equipment to operate over broken glass, nails, sharp metal and rock with no worries of flat tires. For years, the durability of TyrFil Green has been field-proven in thousands of industrial and off-road applications. Using TyrFil Green not only keeps your equipment on the job, it keeps used tire fill out of landfills. Production increases and the Earth's carbon footprint decreases.

#### Benefits at a glance...

##### Reliable

- Field-proven for almost 10 years
- Consistent high-quality product
- Eliminates chunking which may cause failures

##### Economical

- Contains up to 65% recycled tire fill
- Typically recycling materials cost more but not TyrFil Green

##### Eco-Friendly

- Eliminates dumping used tire fill into landfills
- Reduces the Earth's carbon footprint
