

got flats?[®]

TyrFil[®]

NO AIR = NO FLAT TIRES!

TyrFil, a polyurethane tire fill, allows industrial equipment to operate over broken glass, nails, sharp metal and rocks without the worry of flat tires. For years, the durability of TyrFil has been proven in thousands of industrial applications including construction, mining, and overload applications.

BENEFITS AT A GLANCE...

- Eliminates downtime due to flats
- Lowers vehicle center of gravity
- Improves vehicle stability
- Eliminates need for tire pressure checks
- Improves tread wear

TyrFil LD Lowest durometer for the softest ride possible

TyrFil XL Low durometer for a softer ride

TyrFil G2 Medium durometer, all purpose product suitable for most applications

TyrFil MG Medium to high durometer for underground mine and overload applications

TyrFil HD High durometer for airbridges, static displays and overload applications

ISO 9001:2008 Certified
